(54)**MULTIHEAD TYPE PRINTER**

COPYRIGHT: (C)1999,JPO

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a printer of a low cost for printing at a high speed with high resolution.

SOLUTION: In the multihead type printer comprising a recording head 2 having a plurality of recording elements 1 formed at a predetermined interval to form an image, the plurality of the elements 1 are aligned at an equal interval in one row, disposed, and the relationship between the head and a sub-scanning feeding is specified to satisfy a relation of $Q=j \times p$, where (p) denotes a feeding pitch of the element in the sub-scanning direction or element arranging direction, (j) denotes a natural number and Q denotes a pitch of the heads.
